DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 26- 41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perez in view of Smith.

Perez discloses a speculum and method comprising:

- A handle;
- A shorter member 12 that abuts the cervix;
- A longer member 14;
- Positioning the dilator in the vaginal cavity;
- Pivoting the dilator member;
- An actuator 34;
- The shorter member rotates;
- A coupler 28, 32, and 24; and
- It is at about a 90-degree angle.

Perez lacks the use of a longer member on the bottom and the shorter member on the top.

It would have been obvious to one of ordinary skill in the art at the time of the invention to provide

Perez handle flipped with the shorter dilator on top in order to obtain a different view.

Art Unit: 3732

Perez also lacks the dilator being disposed at an angle greater than 90 degrees. Smith teaches the use of the increased angle. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Perez with the angle as taught by in order to get a better view.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lee discloses relevant art.
